

[AVEVA, a global leader in engineering and industrial software, announces that Controsys is the official Citect distributor in Hungary.](#)

"We reinforce our partnership with Controsys as a long-standing distributor for Citect SCADA, an experienced partner with an established customer base. Thanks to the 20+ years' experience and know-how of this company, we are working together to further expand the capabilities of Controsys to always best serve the market" said Anirudh Kumar, AVEVA Channel Manager.

Citect SCADA 2018 delivers on the promise of an intuitive and efficient SCADA upgrade with seamless and streamlined design, operations, maintenance and deployment, and unique connectivity capabilities to complementary hardware and software offerings. As a result, our customers can build effective Situational Awareness enabled SCADA solutions to take back control of their operations and increase operator awareness and operational productivity with real-time decision support; with the bandwidth to focus on driving efficiency gains and increasing overall profitability.

About Controsys

In close relation with its partners Controsys Ltd. delivers computer based process control and supervisory systems combined with Application Lifecycle Management and automation components to its Hungarian and foreign customers.
