

SPS-IPC-DRIVES 2015:

New Products from Softing

Dear Friends,

Please find below a short summary on new products which we presented on the SPS-IPC-Drives 2015 :

dataFEED uaGate SI: embedded OPC UA Server Gateway for Siemens PLCs

This is the first version of a new gateway generation which connects one Siemens S7-PLC to OPC-UA-Clients with its integrated OPC-UA-Server.

What is the difference to echocollect UA?

- dataFEED uaGate SI “only” offers a connection from just one S7-controller to OPC-UA-Clients, while echocollect connects max. 15 S7, S5, Modbus/TCP controllers, Mitsubishi, CLX etc.... to OPC-UA-Clients, to databases, to files etc..
- due to the strict focus on one S7 to OPC-UA you can configure our dataFEED uaGate SI with just a few clicks. You do not need the Netcon configuration tool anymore. Everything is done via the integrated webserver which makes dataFEED uaGate SI almost a “plug&play” device.
- dataFEED uaGate SI comes at a very hot price.

Please find more Info on our webarea:

Article No.: GCL-AL-024600
Availability: from 15 Feb 2016

PBpro USB: Universal PROFIBUS Interface with USB High Speed

This is the new successor of our well known PBusb.

Please find more Info on our webarea:

<http://industrial.softing.com/en/products/interface-cards-gateways/usb-interface-cards/profibus/universal-profibus-interface-with-usb-high-speed-port.html>

Article No.: DUL-NN-012410

Availability: from today

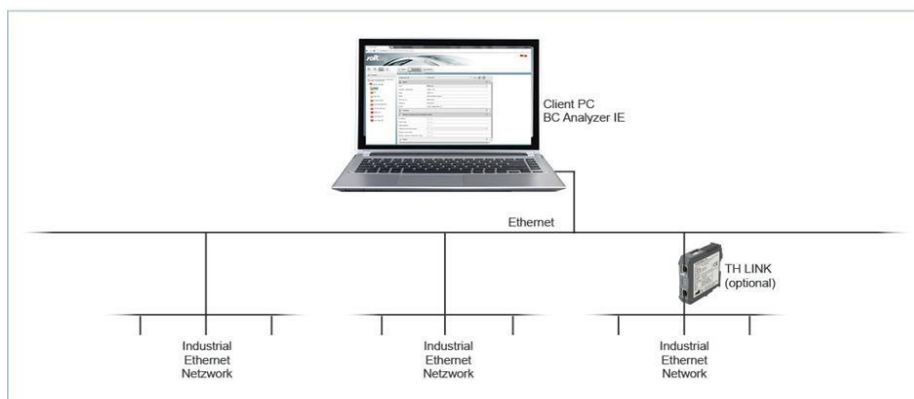

BC Analyzer IE: Software Product Bundle for Mobile Industrial Ethernet Diagnostics

This is a software product bundle for **Mobile Industrial Ethernet Diagnostics**. BC Analyzer IE is a software product bundle, addressing the requirements for performing acceptance tests and troubleshooting tasks in Industrial Ethernet networks, in particular PROFINET.

BC Analyzer IE combines the Softing Industrial Automation software products

- TH LINK PC Industrial Ethernet,
- TH SCOPE
- TH SCOPE CT (SW-add-on for automatic report generation for commissioning and troubleshooting)

and is designed to run on a notebook PC platform for mobile usage.
